# CNS-Tap Tool User Guide

This guide helps you get started using the CNS-TAP web application and discover all the different features that this app offers:
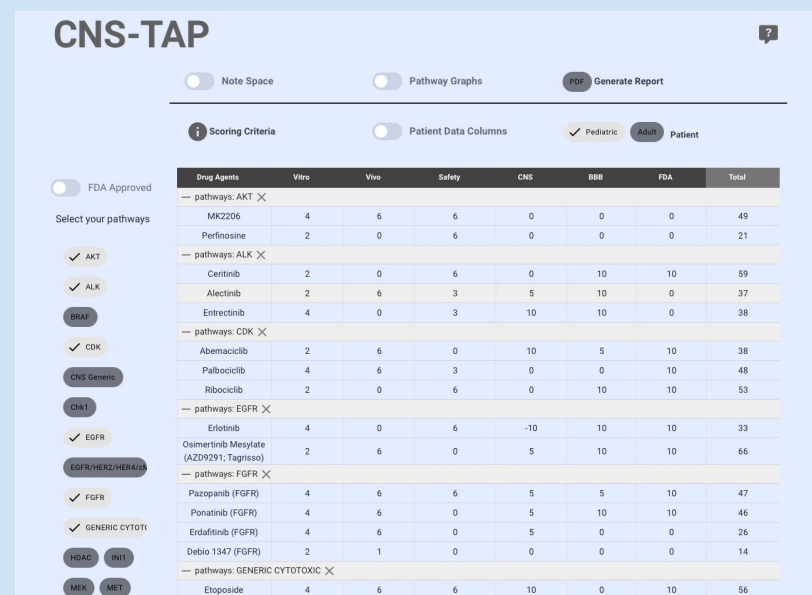

Home Screen

The Home Screen provides details about the CNS-Tap tool as well as the disclaimer. You can also bookmark this page for easy and repeated access of CNS-TAP

Main Screen

The Main screen is the primary interface of the app. Here, you can see all the different agents that are in the tool and can filter based on your pathways of interest and can enter patient specific data

For more help, please see the following tutorial: https://www.youtube.com/watch?v=558jVNYITSk

Left Menu

Select your pathways
- ✓ AKT
- ✓ ALK
- BRAF
- ✓ CDK

Select your relevant Pathways. If no Pathway is selected, data for all Pathways will be displayed

FDA Approved — Switch to filter FDA approved drugs only
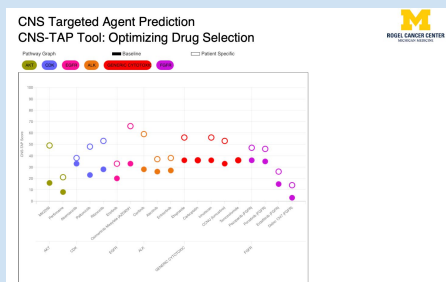

Top Menu

Note Space — Switch to enter custom notes, which will be retained in the generated report

Pathway Graphs — Switch to view graphs that show baseline and patient specific scores for drugs in selected pathways

CNS Targeted Agent Prediction
CNS-TAP Tool: Optimizing Drug Selection

PDF Generate Report — Click here to generate a PDF report with Data table, Notes, and Graphs

ⓘ Scoring Criteria — Click here to view how each category is scored and weighted in the algorithm

Patient Data Columns — Switch to input patient specific sequencing data to generate patient specific scores

✓ Pediatric | Adult | Patient — Switch to select the patient age group

Operations

- Select the relevant Pathway(s)
- Click "FDA Approved" switch for search on FDA approved drugs only
- Select relevant on the top of the drug table
- Enter custom notes (Options)
- Click "Pathway Graphs" to view Graph
- Click "Patient Data Columns" to enter any Patient specific data
- Click "Generate Report" to download PDF report
